# PROJECT

## OVERVIEW

# EXECUTIVE SUMMARY

The design team has had the pleasure of working with CCSD to develop a detailed program and updated elementary school ed spec for a new comprehensive elementary school.

The building will be 82,890 s.f. and will house typical elementary school functions and support spaces such as an administrative center, student activity center, kindergaten center, learning center (grades 1-5), special program center, maintenance and operation and resource material center.

During the programming phase, the 2017 CCSD Elementary School Ed Spec was used as a guide, coupled with the design teams past experience with similar facilities and most importantly, the involvement of those in charge of running these departments in the district. An interactive programming process helped to align the existing building program from 2017 with the current space needs of 2023 as well as define the overarching goals of the project. Summaries and a detailed tabular program are provided within this document as are diagrams illustrating functional relationships and space specific requirements.

Refinement of the program has occurred over multiple workshops with several design teams. Information gathering at each workshop was vital to keeping the design schedule on track, and there was excellent participation and follow through from all of the stakeholders. The information included

in this document is the culmination of the efforts of all those involved.

Prior to the commencement of the programming workshops, the design team and CCSD visited Ferron Elementary School, Beverly Mathis Elementary School, Uilom Elementary School, and Dennis Ortwein Elementary School. We discussed the pros and cons of the existing space and which programs would be similar to those going into the new elementary school. Based on these discussions, CCSD has decided to proceed with the general use restrooms which are reflected in the following programming documents.

The programming workshops were held in February and March of 2023. They began with a general overview and discussion of the overall goals for the new facility and included images from similar programs to facilitate the discussion of current trends and how the current spaces are used. After each session the design team used the information gathered to start a tabular program which identifies the spaces required for each department and began initial space layouts.

Major changes to the program that came out of those workshop include: seperate distinct health office spaces, sick and well rooms. This document includes alternate design initiatives for multipurpose room and PE classroom.

After the initial workshops were completed, we met with all stakeholders to review the information to date which included the initial layouts of each space. During this review the design

team was able to gather the information needed to finalize the layout and size of the required spaces. We also discussed potential shared spaces, adjacencies, and verified each department's organization. Throughout the programming process, we met with CCSD Construction weekly to facilitate overall project progress.

## GUIDING STATEMENT + OBJECTIVES

The design will maximize the role of the built environment in achieving CCSD'S goals and core values

The design will provide innovative, flexible, and engaging spaces, foster intuitive teaching and learning, create a safe and welcoming environment for all, and reduce limitations to activating the facility.

The design will integrate spaces and programs, remove barriers to technology engagement, and allow for formal and informal settings for positive student academic and social activities.

The design will maximize flexibility and adaptability to champion meaningful learning now and into the future.

The design will thoughtfully engage parents/families as well as the greater community and support the continued strengthening of the many partnership relationships that influence student success.

# PARTICIPANTS

## Programming Participation Structure & Chain of Communication

### Executive Committee Members

Brandon McLaughlin  
CCSD | Assistant Superintendent, Construction Management

Josh Chesnik  
CCSD | Interim Director, Construction Management

Johny Corona  
CCSD | Project Manager

Melissa Avelar  
CCSD | Project Manager

Gia Moore  
CCSD | Assistant Superintendent, College and Career  
Readiness and School Choice

Tracy Murphy  
CCSD | Director, Demographics, Zoning, and GIS

Alaina M. Criner-Wilson  
CCSD | Assistant Superintendent, Curriculum and Instruction  
Division

### Departmental Participants

Sonia Houghton: ELL

Lucas Leavitt: Online/blended Learning

Kris Carroll: Science

Chip Peterson: Health/PE

Shannon La Neve: Humanities

Jeffrey William: Fine Arts

Robert Jones: Curriculum

Jessica Lovell: Sierra Vista Principal

Ian Salzman: Desert Oasis Principal

Kris Patrick: Food service

Mitchell Maciszak: Police Services

Jai Beasely: Emergency Management

Paulette Marshall: Construction Management

Norman "Dean" Kiernan: Emergency Management

Marelyn Lobo: Demographics, Zoning and GIS

### KNIT

Mark T. McGinty

Brett Anderson

Cameron Tate

Gaelle Sawadogo

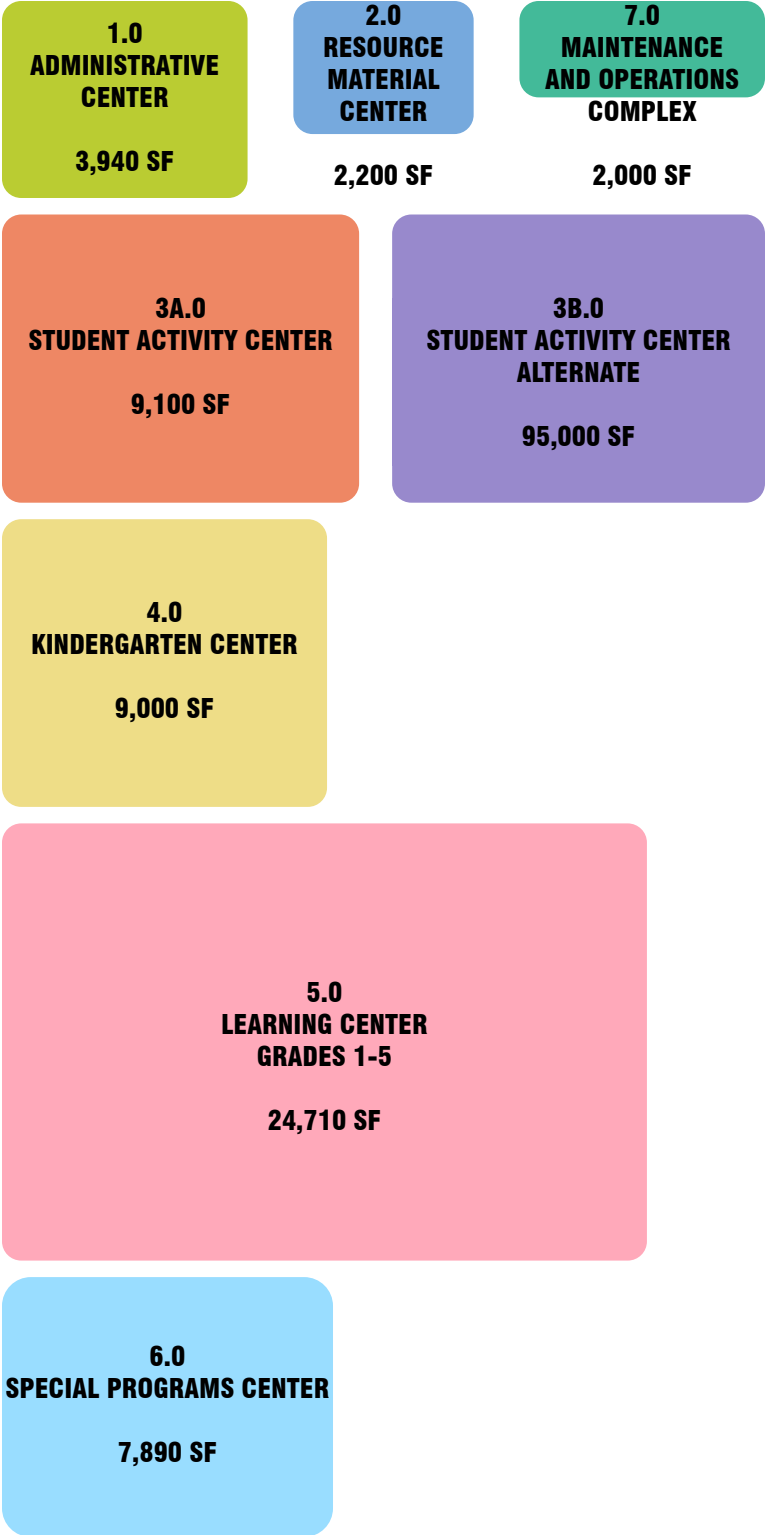

Jesse Decker

LaRae Tomera

# PROGRAM

## **FACILITY CONSIDERATIONS**

## FACILITY CONSIDERATIONS | GENERAL

- 1 849 student population for a nine (9) months school.
- 2 46 teaching stations.
- 3 Use CCSD Design Manual and Standards and Guideline Specifications for the design of architectural (door and windows frames and hardware, roofing, cabinetry, etc.), mechanical, plumbing and electrical (high and low voltage) systems. Appendices with Standards and Guideline Specifications for some major building systems are hereby attached. Coordinate with related CCSD departments the design of any system not included.
- 4 ADA accessibility throughout the facility, per the latest ADA and Nevada Accessibility standards and requirements.
- 5 Provide one Family Restroom adjacent to each student restroom areas.
- 6 Provide individual classroom lighting control next to all doors, to darken classrooms for video presentations, and to provide switching for emergency lighting tied to the security system.
- 7 Provide individual classroom HVAC zoning.
- 8 Provide an Energy Management System (EMS) with 15% expansion capability as directed by CCSD Energy Manager. The EMS System should allow control from both the school maintenance center and the centralized school district Energy Management Control Center. Include a panel with an adjacent phone outlet.
- 9 Any interior school area that will accommodate 50 or more persons in an assembly should be provided with Assistive Listening System (ALS) devices, equivalent to an infrared ALS system.
- 10 Provide zinc raised metal signs for an interior signage package to consist of: (1) room number(s) and room usage signage to meet the ADA requirements, and (2) directional signage to indicate locations of rooms coming from the office and “to office” signs from the exterior doors back to the office.
- 11 All office or classroom windows facing the exterior should receive interior one-touch vertical blinds, except in the Health Center.
- 12 Ensure that any wall hung lavatories and cabinetry receive additional support to avoid pulling away from the wall.
- 13 All rest rooms should be vented to the outside.
- 14 Provide trap primers at all floor drains.
- 15 Provide tempered water for all lavatories and sinks used by students.
- 16 Do not place any electrical equipment or electrical room(s) adjacent to the ER and TR’s.
- 17 Acoustic guidelines for areas with special sound attenuation needs.
  - a MPR should accommodate a wide range of functions with various acoustic requirements.
    - i Provide a balanced reverberation time (or utilize adjustable absorption) to accommodate intended use functions.
    - ii Provide moderate to high levels of sound isolation. Distribute sound absorptive wall treatment throughout the room.
  - b Control background (ambient) sound levels from HVAC equipment and air distribution system to accommodate the acoustic criteria for the most stringent use function.
  - c Conference room should maximize sound isolation to accommodate confidential conferences.
    - i Provide a high degree of sound isolation (STC approximately 50+) at walls and floor / ceiling construction.
    - ii Provide moderately absorptive ceiling and wall treatment.
  - d Music Classroom should maximize sound isolation for non-disturbance of nearby classrooms.
    - i Control reverberation for a balanced acoustic quality live enough to promote sound projection; dead enough to avoid unwanted reflections.
    - ii Provide a high degree of sound isolation at walls and floor/ceiling construction (sound transmission class may not be applicable due to low-frequency noise).
    - iii Control background (ambient) sound levels from HVAC equipment and air distribution systems.
    - iv Provide gasketed doors or sound isolating doors or vestibules.
  - e Classrooms should minimize sound transmission from nearby classrooms.
  - f Library should minimize sound transmission from nearby classrooms. Distribute sounds absorptive wall treatment throughout the room.
- 18 Tackable wall surface installed in key areas, such as walls in corridors, to be equivalent to Koroseal 24 oz. vinyl. Texture should be minimal to facilitate cleaning.

## FACILITY CONSIDERATIONS | GENERAL CONT.

- 19 Semi-gloss paint must be provided for finish surfaces throughout.
- 20 Interior doors to offices, classrooms, Library, and MPR should have observation windows 8” wide by 3’ long as a minimum, unless otherwise indicated.
- 21 All doors should receive kick plates on the bottom.
- 22 Student drinking fountains to be non-electric, ADA compliant, and of a model type designed to minimize spillage over the edges.
- 23 Security Keypads to be provided per CCSD Intrusion Alarm System Standards.
- 24 Provide infrastructure for CCTV cameras per CCSD Security Camera System Standards.

## FACILITY CONSIDERATIONS | EXTERIOR AREAS

- 25 All corridors’ flooring should have VCT finish.
- 26 Provide school name and street address in metal lettering located at the front of the school high up on the wall and visible from the street. Street address numbers should also be located on the roof.
- 27 Provide a flagpole located at the front of the school in a visible location.
- 28 Provide school bus loading/unloading area for (6) buses minimum, completely separated from the parents drop-off area.
- 29 Provide faculty, staff, and visitor parking for a minimum of 105 vehicles.
- 30 Provide parents drop-off/pick-up area, completely separated from the school buses area.
- 31 Provide lighting in all parking and bus areas.
- 32 Street sidewalks and staging areas at crosswalk access points should be adequate to accommodate pedestrian volumes at peak time.
- 33 Provide external speakers for audio communications from the office on each exterior side of building(s) towards the playground areas, to enable students to hear school alarms, recalls, and messages. The speakers and sound system shall ensure a good and clear transmission of

- the audio communication.
- 34 All fencing to be galvanized.
- 35 Minimize any exterior area that can be used for hiding. Any such area should be fenced off.
- 36 Any external appurtenances should not enable students to climb up to the roof.
- 37 Exterior roof drain down spouts should be located away from exterior doorways.
- 38 Provide 32 foot wide gate for future portable classrooms mobile access from street near portable location on site.
- 39 Provide electrical, fire alarm, intercom and data connections for siting of four (4) future portable classrooms. (Portables should be sited to face the school, therefore, stub-up and pull boxes should be placed accordingly.)
- 40 Provide gated dumpster trash enclosure area for three dumpsters, with automatic night controlled lighting and a can wash area with hose bib for wash down.
- 41 Provide exterior drinking fountains with at least (3) bubblers on all sides of the building(s) (excluding the front of the school). Include vandal-resistant hose bib under the fountains.
- 42 Provide additional vandal-resistant hose bibs or vandal-resistant quick coupler valves on courtyard sides of the buildings for wash down of areas.
- 43 Provide an exterior outdoor learning area/garden near the Turf Play Area for botanical classroom learning, with at least 18” of top soil to grow standard garden eatable items, i.e. corn, potatoes, tomatoes, etc. Include standard irrigation for support. Also, provide one hose bib.
- 44 Fire hydrants should not be located in the playground areas.
- 45 Exterior walls shall be finished with Anti-graffiti coatings (at least two-coats).

### DESCRIPTION

Main public entrance. Relate to the Pupil Personnel Area for indirect access. Two clerks aides. Area seating for 6 people.  
 Two 4' x 8' wall-mounted tackboards.  
 Built-in one level reception counters, 48" A.F.F. on the reception side, and 32" A.F.F. on the working side, with four duplex outlets, quadplex outlets as appropriate, undercounter storage with lockable bank drawer, one file drawer, and conduit for computer networking with cable back to central computer rack. The raised portion of the desk should be high enough to stand binders under it. Make counters wide enough for (2) computer and keyboard stations, locate the electrical outlets for computer/keyboard under the desk and make one hole for each station in the counter top to run the electrical cords through (1 /14" wide x 5" long).  
 The cupboards should be located on end of counter furthest away from the main entrance.  
 Drinking fountain on seating area side. ITV outlet. One clock/intercom.
